Professional Experience

Frontend Developer

Nirjai Technologies Pvt. Ltd., New Delhi

December 2024 – August 2025

- Developed and maintained 15+ responsive web applications using ReactJS, implementing reusable components and state management with Redux, improving code reusability by 50%.
- Built dynamic user interfaces using Angular framework with TypeScript, integrating RESTful APIs and handling complex data binding for enterprise applications.
- Optimized web application performance by 40% through code splitting and implementing best practices in React Hooks and lifecycle methods.
- Collaborated with UX/UI designers and backend developers in Agile sprints to deliver pixel-perfect, cross-browser compatible features on schedule.

Projects

HDU Health Care Portal

ReactJS, Redux, HTML, CSS, REST API, Axios

March 2025 – Present

- Developed patient management dashboard using ReactJS with Redux for state management, handling 1000+ daily active users with real-time data updates.
- Created 25+ reusable React components including forms, modals, and data tables, reducing development time by 30% for new features.
- Integrated REST APIs using Axios for appointment scheduling, patient records, and medical reports, implementing error handling and loading states.
